May 10, 2006

To: Residents along Big Flat Road
Cyclists and Pedestrians who Use Big Flat Road
From: Citizens concerned with transportation safety
Re: **Big Flat Road Area Improvements**

Last April, Brittany Brindley was riding her bike through the 90 degree turn on Big Flat road (where Paradise turns off) and was hit by a car that was 'cutting the corner'. Residents and Britany Brindley met with Missoula County Engineer, Tim Elsea, and Transportation Engineer, Erik Dickson on May 2nd, 2006, at 7PM at the S curve area on Big Flat road to discuss improvements that could be made to the road**. Funds are available for the immediate and long term improvements to this road. Recommendations such as a bike path, road signs, reflective markers, and wider shoulders are possible with the support of residents and community.**

We, the citizens support the efforts for improvement of pedestrian and safety conditions along Big Flat Road from McClay Bridge through the S curve areas.
